Exhibition

Grundlagen: Vitrinen. A Zürich Lexicon

11–27 September | ETH Zürich, Hönggerberg, HIL, gta exhibitions Foyer

As part of the first year Course ‘Grundlagen der Geschichte und Theorie der Architektur & IT’ 2023–2024, students were invited to explore the city of Zürich by looking at the variety of shop windows and vitrines that can be found across the city. The vitrine is a fascinating architectural and urban element that materialises and transgresses the border between public space and interior. Students were asked to analyse the architecture of vitrines in the form of diptychs – a combination of text and drawing – and these are presented in this exhibition. Together they construct a lexicon of vitrines that speaks of the characteristics of the city of Zurich.

Lecture Series

Master’s Thesis Lecture Series: How to House Europe? Within the Existing!

Autumn Semester, 18:00 | ETH Zürich, Hönggerberg, HIL E1 or online

The existing building stock is our greatest opportunity: at this point only 25% of Europe’s buildings have been renovated. To meet the European (and Swiss) Climate Goals for 2050, we need to triple the current annual renovation rate of 1%. Meanwhile, Switzerland is projected to see a population increase of 1 million people by 2050. This is a call for architects to act and address the challenge: how do we house these people? Within the existing structures!

This is a collective project by the Department of Architecture at ETH Zurich, aimed at finding architectural solutions to societal and planetary challenges. The lecture series will bring in perspectives from selected experts across various fields, providing a broader understanding of the topic. Each chair will address the theme through their unique methodology and architectural approach, focusing on both design and legislative aspects.

Programme overview

- 17 September: On Europe and Renovation. s+ (station.plus) + guests (HIL E1)
- 24 September: On Finance and Speculation, Aris Komporozos-Athanasiou, Center for Capitalist Studies UCL, London (online)
- 1 October: On Risk and Transformation, Enlai Hooi, Tamara Kalantajevska, Heads of Innovation SHL, Copenhagen (online)
- 8 October: On Commons and Laws, Joanna Kusiak, Professor for Sociology Cambridge, Berlin (online)

ETH RAUM

Öffentliche Vorlesungsreihe

Zukunft Raumentwicklung

Herbstsemester | ETH Zürich, Hönggerberg

Im Rahmen des CAS in Zukunft der Raumentwicklung, lädt ETH RAUM Interessierte zu einzelnen öffentlichen Vorlesungen ein.

Die Öffentliche Vorlesungsreihe soll einen kritischen Blick, aber auch Lösungsmöglichkeiten und interessante Herangehensweisen aus der Raumentwicklungspraxis liefern. Nationale und internationale Fachleute reflektieren über ihre Planungs- und Entwicklungspraktiken zum Thema «Zukunft der Raumentwicklung».

ETH Wohnforum – ETH CASE

Open House Zürich

Quartierrundgang «10-Minuten-Nachbarschaften»

25. September, 18:15 – 19:15 | Treffpunkt: Angabe nach Anmeldung

Gemeinsam mit Dr. Sibylle Wälty, Architektin und Raumentwicklungswissenschaftlerin am ETH Wohnforum, erkunden wir den Kreis 9 rund um den Lindenplatz und entdecken die Prinzipien der 10-Minuten-Nachbarschaften.

Dr. Wälty hat Kriterien dieses Konzepts an der ETH Zürich entwickelt, bei dem alles für das tägliche Leben innerhalb von zehn Minuten zu Fuss erreichbar ist: Wohnen, Arbeit, Dienstleistungen und öffentlicher Verkehr. Diese Quartiere schaffen mehr Wohnraum und wirken der Zersiedelung sowie der sozialen Entmischung entgegen.

Platzzahl beschränkt,
Anmeldung über: www.openhouse-zuerich.org

Colloquium

Baukultur Back to the Future

3–4 October | Academy of Architecture, Mendrisio und Lugano

This two-day colloquium, organized by the Stiftung Baukultur in collaboration with the Università della Svizzera Italiana, the Accademia di Architettura and the Iza Istituto Internazionale di Architettura, will address the urban, landscape, and architectural issues that are conditioned by changing populations. Hosted at the Academy of Architecture, Mendrisio, it will explore the economic, social, and urban planning contexts that can be understood in relation to demographic transformations.

LUS Talks 2024: AFTER BREAKDOWNS

Autumn Semester, 18:30 – 20:00 | ETH Zürich, Design in Dialogue Lab, Neunbrunnenstr. 50, Zürich Oerlikon

LUS Talks is a public lecture series that addresses critical questions in landscape and urban studies. This year, we explore the spatial challenges and societal changes arising from current breakdowns – disruptive moments in ecological processes and urban systems. What is falling apart and why? Who offers alternatives to these failing structures, and how do they sustain themselves when routine returns? We will examine how practices are transformed and discuss ways to resist, care for, and ultimately regrow from the remnants of the past. The LUS Talks are curated by Robin Hueppe, Carina Sacher, and Juan Villalón Hernando, and an apero follows the lectures.

Programme overview

- 10 October: Prof. Matthew Gandy, University of Cambridge, England.
- 7 November: Prof. Jennifer Mack, KTH Royal Institute of Technology, Sweden.
- 20 November: Ass. Prof. Erin McElroy, Department of Geography, University of Washington (online lecture) and Prof. Hanna Hilbrandt, Department of Geography, University of Zurich.
- 4 December: Claudia Amico and Zulema de la, Ama Amancaes, Perú and Soledad Patiño, Stefano Romagnoli and Joaquín Tome, Región Austral + CEEU, Argentina.

Event

Brasilândia Design Studio Exhibition at University of St. Gallen Latin America Week

21–24 October | SQUARE, Guisanstrasse 20, 9010 St. Gallen

An exhibition showcasing academic proposals for the Brasilândia region (São Paulo, Brazil) developed collaboratively by students from ETH Zurich and the Faculty of Architecture and Urbanism of the University of São Paulo (FAU-USP) will be held during Latin America Week at the University of Saint Gallen. These proposals envision transforming an abandoned quarry into a park for the surrounding informal settlements and an under-construction metro line, among many others.

Workshop

Digital Double

Situating and Troubling AI Technologies for Architectural Reconstruction and Urban Simulation

24 and 25 October, 09:00 – 18:00 | Bibliotheca Hertziana – Max Planck Institute for Art History, Rome

The workshop “Situating and Troubling AI Technologies for Architectural Reconstruction and Urban Simulation,” led by Julio Paulos (ETH/FCL) and Dario Negueruela del Castillo (UZH/DVS) and part of the AI & Cities series, explores AI’s role in urban planning. It examines how AI can aid architectural reconstruction and urban simulations, addressing ethical, social, and practical implications. By bringing together scholars from diverse fields, the workshop aims to foster a nuanced understanding of AI’s impact on future city development.

2 + 2 + 1: Eine Debatte über zeitgenössische Landschaftsarchitektur

30. Oktober, 3. Dezember, jeweils 18:30 | Langstrasse 200, Zürich

Martina Voser im Gespräch mit Gästen

Die zeitgenössischen Herausforderungen aufgrund von Klimawandel und Verdichtung verlangen nach Adaption und Innovation. Um auf die Komplexität der im Raum stehenden Fragen reagierend neue Strategien entwickeln zu können gilt es, unser Wissen zu teilen – sowohl zwischen unterschiedlichen Spezialist*innen als auch Generationen. In diesem Sinne lanciert 2 + 2 + 1 die Debatte zwischen praktizierenden Landschaftsarchitekt*innen, Lehrenden und Studierenden. Auf der Suche nach neuen Strategien und Positionen in der Landschaftsarchitektur.

Symposium

Matters of Urban Expertise

Who Develops the City of the Future?

6, 7 and 8 November, 09:00 – 18:00 | ETH Zürich

The symposium “Matters of Urban Expertise: Who Develops the City of Tomorrow?” explores the roles of various experts in shaping future cities, emphasizing the rise of interdisciplinary collaboration and innovative approaches to complex urban issues. A joint initiative of ETH Zurich and KTH Stockholm, it brings together international leading academics to discuss urban development, exploring new formations of urban expertise and addressing emerging challenges in urban planning.

Book Launch

SDG11 – Transitioning to Sustainable Cities and Communities

14 November | ETH Zürich, Design in Dialogue Lab, Neunbrunnenstr. 50, Zürich Oerlikon

This event will launch the edited volume “Transitioning to Sustainable Cities and Communities” (published by MDPI), which features scholarly articles and interviews from leading experts working in various fields anchored in urban design and architecture. Each piece in the volume addresses the challenges and opportunities prompted by the SDG11, and by extension, the climate crisis. As a whole, the volume illuminates and showcases novel research and design approaches to deal with issues like safety, air pollution, inequality, geopolitics, post-war planning, and other key topics for cities and communities. Drawing largely from examples in the Global South, where various forms of scarcity give rise to inclusive and sustainable solutions for the entire world, the volume aims to meet the challenge of the multi-crises of the 21st century through evidence-based design experiences, case studies, and projects.

D-BAUG Urban Research Seminar: Cities, Landscapes, Infrastructure, People

22. November | ETH Zürich, time and location TBA

The D-BAUG Urban Research Seminar aims to build a bottom-up network of early career researchers on urban topics. Led by Prof. Dr. David Kaufmann, the seminar intends to explore the variety of perspectives, concepts and methods from which urban research is approached at D-BAUG. The seminar consists of short talks in which early-career researchers from various institutes have the opportunity to present and discuss their urban research agendas.

Colloquium

Urban Codes and Urban Forms: The Case of Zurich

27 November | ETH Zürich

This colloquium investigates how rules and regulations have influenced the outlook and character of urban spaces in Zurich. In particular, it asks: how did regulation influence the development of housing, spaces of work, education, and leisure? What is the relationship between codes regulating mobility and the making of urban spaces?

Organised by the Chair for the History and Theory of Urban Design, Prof. Dr. Tom Avermaete, ETH Zurich in collaboration with ISUP (Institute of Urban and Landscape Studies) of USI (Università della Svizzera Italiana)

Call for papers open until 15 September
