Monthly Seminars

Brown Bag Lunch

The monthly Brown Bag Lunch (BBL) Seminars provide to our researchers, visiting guests, invited speakers and participants an opportunity to share and debate over research ideas, concepts and findings. Most BBL seminars are held in English. We welcome the participation of researchers and students interested in the discussed topics.

14.09.17 Harriet Bersier: Future strategies of cooperative, non-profit and profit limited housing organizations in Europe – a comparative study.

12.10.17 Sibylle Wälty: Despite or because of land use and design control: Has urban growth gotten out of control?

16.11.17 Andree Hagn: Politicising the urban: The politics of slum re-development in the temple city of Puri, Odisha.

14.12.17 Michaela Schmidt, Eveline Althaus: Housing migrants and refugees.

Dates 2018 see www.wohnforum.arch.ethz.ch – Events

Institute for Transport Planning and Systems

4th SCCER Mobility Annual Conference

15 September | ETH Zürich

The conference will be an opportunity for our academic and industrial partners to discuss the most relevant research results achieved so far, to find new cooperation partners and to get a glimpse on what are the current research issues being addressed by the competence center.

Keywords:

Dipl.-Ing. Andreas Lischke from the DLR German Aerospace Center, Institute of Transport Research

Dipl.-Ing. Michael Frühberg from Volkswagen, Group Research Powertrain

Deadline for poster contributions: 31 August 2017.

Further information: www.sccer-mobility.ch/abouts/sccer_events/4th-SCCER-Mobility-Annual-Conference

Contact: Dr. Gloria Romera Guereca, PMP, Managing Director SCCER Mobility, ETH Zürich, LEO C14, Leonhardstrasse 27, 8092 Zurich. Phone: +41 44 633 8006.

Future Cities Laboratory (FCL)

2nd Annual Conference

Future Cities / Transactions: Exchanging Knowledge Between Switzerland and Asia

20 to 22 September 2017 | ETH Zurich, Hönggerberg

HIT building

Asian populations are urbanising at a rate and volume that is unprecedented in human history. If they do so in the same resource-intensive manner as western countries did during the 20th Century, it would exceed the biophysical capacity of the planet several times over. Averting a disaster of these global proportions involves understanding, designing, planning and managing cities in new and innovative ways at many scales.

The Future Cities Laboratory (FCL), a research unit of the ETH Zurich based in Singapore with researchers from over 35 nationalities and 20 disciplines spanning science, social science and design, benefits from old and new transaction networks. By holding this conference in Zurich, we foreground the place of Europe, Switzerland and the city of Zurich itself in the global challenges of urbanisation. In doing so we focus on the transactions between:

- Zurich and Singapore
- Europe and Asia
- Science, social science and design
- Research approaches and paradigms
- Academia, government, industry and civil society

Book Launch

The Noise Landscape

A Spatial Exploration of Airports and Cities

26 September | 18:00 h | ETH Zurich, Hönggerberg | HIL H 40.4

17 October | 18:00 h | EPFL, Archizoom

The expansive areas around large airports that are affected by noise, infrastructure, and transient forms of architecture have never before been researched as a phenomenon. But these Noise Landscapes are emerging worldwide, often surpassing their neighbouring city in size, and sometimes rivaling it in economic importance.

On the basis of eight European case studies (Amsterdam, Zurich, London Heathrow, Frankfurt, Munich, Madrid, and Paris Orly and Charles de Gaulle) this publication provides the first account how these landscapes emerged as the result of technical determinations, what takes place in them, and how they can be interpreted.

The book is the outcome of several years of research done by the Chair of Kees Christiaanse at the ETH Zurich.

Book Launch

Reactive Athens: 101 Ideas

September 2017 | Zurich, Switzerland

Reactive Athens (Ruby Press, forthcoming) was conceived in 2013 as a participatory research and design initiative directed by the Urban-Think Tank Chair of Architecture and Urban Design. Supported by the Onassis Foundation, an interdisciplinary team analyzed processes of urban decline and generated new ideas for the Athens city center that address the crippling impacts of the economic and social crisis.

Institut für Raum- und Landschaftsentwicklung | MAS Raumplanung

Erörterungen zu den Abschlussarbeiten des MAS in Raumplanung

4. bis 6. Oktober | ETH Zürich, Hönggerberg | HIL H 40.4

Das Programm wird Ende August auf <http://www.masraumplanung.ethz.ch> publiziert.

Eine Auswahl bereits publizierter Abschlussarbeiten findet sich auf <http://www.masraumplanung.ethz.ch/forschung/mastthesis.html>.

Lecture

Earth Gods: Urbanism and Landscape in the Anthropocene

10 October 2017 | 16:00 h | ETH Zurich, Hönggerberg | HIL H 40.9

Lecturer: Richard Weller, Professor at the Martin and Margy Meyerson Chair of Urbanism; Chair of Landscape Architecture at The University of Pennsylvania.

Departing from Stuart Brand's expression that in the Anthropocene humans have become gods and "have to get good at it", this lecture explores the spatial tensions between conservation and development on a global scale and builds the case for an expanded understanding of design in the 21st century.

Moderation: Karin Salm

Referenten:

Dipl.-Arch. ETH/SWB Conradin Clavuot, Architekt, Chur

Prof. Dr. Daniel Farinotti, Glaciologe, ETH Zürich, Assistentenprofessor für Glaciologie, D-BAUG

Dr. Felix Keller, Glaciologe, Co-Institutsteilnehmer ETI an der

Academia Engiadina, Geschäftsbereich Landschaft und Umwelt

Prof. Dr. Hans Oerlemans, Meteorologe, Geophysiker, Universität Utrecht

NSL Kolloquium

Common Water – The Future of an Alpine Resource

20. Oktober 2017: Exkursion ins Morteratschgebiet

21. Oktober 2017: Kolloquium in Zürich | 9:00–17:00 Uhr

ETH Zürich, Auditorium HG F30 Rämistrasse 101, Zürich

Eröffnung durch Prof. Dr. Sarah M. Springman, Rektorin der ETH Zürich

Expertinnen und Experten aus Wissenschaft, Landschaftsarchitektur, Politik und Wirtschaft diskutieren an dieser ganztägigen Veranstaltung über aktuelle und zukünftige Fragestellungen und Herausforderungen im Umgang mit der Ressource Wasser mit geografischem Fokus auf den alpinen Raum.
